

GENIUS

Report for WP6

gaia

X. Luri

Universitat de Barcelona

Overview

This work package aims to provide support activities needed for the development of the tasks in the rest of WPs

6.2 Simulations

Three series of GOG simulations plus additional smaller simulations delivered for DPAC use.

These simulations are stored at the main archive for use in validations, accessible through the DB interface and as gbin files.

Some versions also available through the external data centres.

4.3 Science Alerts

Contribution to the development and implementation of the Photometric Science Alerts web site. Site available at: <http://gsaweb.ast.cam.ac.uk/alerts/home>

ioa Gaia Photometric Science Alerts

To browse the alerts published so far, please see the [Alert Index](#) tab. The table provides links to the per-source alert pages, including lightcurves and BP/RP spectra.

STATUS: Operational. Now you can receive alerts on your phone or tablet. Get the iOS app at [AppStore](#)
