BLOG LATEST POST

Rosetta and Philae separation Confirmed

Exactly one year ago, at 10:12 CET, Soyuz V506 with Gaia on board took off from Europe's spaceport in French Guiana, ferrying ESA's billion-star surveyor into space. After an exciting year with a successful L2 orbit insertion, a challenging commissioning period and the start of routine operations, Gaia is now scanning the sky, mapping on average 40 million stars a day. On the occasion of the

The construction of Gaiaverse

After the plenary meeting in Vienna, an Editorial Board was created to carry out a high-level supervision of the portal contents.

Editorial Team

Frédéric Arenou

Eduard Masana

Mariateresa Crosta

Heather Campbell

Gráinne Costigan

The construction of Gaiaverse

- In october, a survey was conducted to gather ideas for naming the portal.
- In november, we started to work on the portal design.

Gaiaverse Roadmap

- Available in April
- Editorial board will supervise contents and will motivate collaboration
- Network of collaborators to inform of:
 - Articles (News, Blog...)
 - Resources and Tools
 - Network of translators

THANK YOU!
